Language: English / Filipino

SUMMARY

I am Aldrin, a Bachelor of Science in Information Technology (BSIT) student at Western Mindanao State University, with a strong interest in mobile application development and UI/UX design. I enjoy building applications from concept to execution, especially in mobile development where I often handle the entire process, from interface design to functionality. For web projects, I focus on front-end development, creating clean, intuitive, and user-friendly experiences.

RECENT PROJECTS

Crimson Map

- Crimson Map is a capstone project developed for Western Mindanao State University (WMSU). The application delivers an Augmented Reality (AR)-based indoor/outdoor navigation system designed to guide new students and campus visitors across WMSU's Main Campus.
- Unity, ARCore, Mapbox, A* Algorithm, Firebase, c#
- Role: Lead Developer

AI-Furqan Islamic Institute Academic System

- This system is a software engineering project developed for a client from a madarasa school, focused on managing enrollment, academics, and administrative processes efficiently.
- Vanilla CSS, JS, HTML, Springboot, Java, SQL
- Role: Front-End Developer

studya.io

- This app will help students optimize their study sessions by integrating Pomodoro Technique and interactive flashcards.
- Flutter, Hive (Database)
- Role: Lead Developer

TECH STACK/TECHNICAL SKILLS

- Flutter, Unity (C#), HTML, CSS, JavaScript, Next.js, Tailwind, Firebase (Authentication, Firestore), REST API Integration, Git & GitHub, Docker, UI/UX Design Principles, AR Foundation

SOFT SKILLS

- Problem-solving
- Fast learner
- Team collaboration
- Clear communication
- Time management
- Adaptability
- Attention to detail
- Willingness to Learn
